

30 Day - Daily Data Collection Measure

Definitions:

Confusion or Agitation is defined as behaviour reflective of either Level IV, V, or VI of the RANCHO LOS AMIGOS SCALE which includes Confused, Agitated Response, Confused, Inappropriate, Non-agitated Response, and Confused, Appropriate Response.

Examples: unaware of impairments, disabilities, and safety; not oriented to person, place or time; incoherent verbalizations; attempts to remove restraints, tubes, or crawl out of bed; cries out disproportionately even after the triggering stimulus is removed; exhibits labile mood (swings from happy to hostile with no observable connection to events within the environment); wanders without intent; confuses past or present; inappropriately uses items (e.g., comb to brush teeth).

Verbal Aggression is defined as hostile, intense verbal behaviour such as raising voice greater than conversational level, using obscenities, and/or threatening harm to others.

Physical Aggression is defined as violent behaviour directed towards another individual or the environment / property. Examples include slapping, hitting, punching, spitting, kicking, biting, throwing an object at someone, kicking or punching the wall and / or throwing items.

Acquired Brain Injury (ABI) as per OBIA is defined as damage to the brain that occurs after birth from a traumatic or non-traumatic event. ABI is not related to a congenital disorder or a degenerative disease.

Date	How Many ABI Clients / Patients Did Your Unit Support Today?	What are the Clients / Patients Genders?	What are the Client/Patient Age Ranges?	How Many of These Clients / Patients Exhibited Confusion and / or Agitation?	How Many of These Clients / Patients Escalated to Verbal Aggression?	How Many of These Clients / Patients Escalated to Physical Aggression?
